

Framework and choices to make learning materials 'Sustainable salon'

Oudenaarde, Belgium

Ganna Chalapko / Franciscus Grotenhuis

Framework / things to consider (according to the planning)

1. discuss the learning material to be developed, based on the results of O1 & O2
2. the goals
3. starting situation
4. draft training schedule
5. level & duration of the course
6. design of the method of delivery (digital and/or physical) (O4)

Development lesson materials

1. Focus = environment (based on the output / standards developed in O2)
For all **hairstresser students** = basic knowledge 'environment at the salon'
For **Salon Manager students** = a more extended program
2. Global goals for different modules (regular vs salon manager students)
3. Starting situation: which knowledge level do students get into the 1st class with?
4. Draft schedule: to be discussed in Malaga
5. Level & duration of the course: can be discussed and decided upon together with the partners. In the previous project the extended version (Salon Manager students) was about 20 hours (depending on the goals)
6. design of the method of delivery (digital and/or physical) - can be discussed now, definitive choice will be made in Malaga

Questions/remarks
