

Press release 6: 17-05-2022

### **Future skills for a better life in Sustainable Salons**

The project Future skills for a better life in Sustainable Salons (Sustainable Salon) had its 3rd offline meeting in El Palo, Malaga, Spain. In this Erasmus+ project, we have gathered facts through an inventory of the hairdresser's future competences in the situation in a sustainable salon and focus on environmental aspects (core of a simple standard). In the meeting on 11<sup>th</sup>, 12<sup>th</sup> and 13<sup>th</sup> of May 2022, we discussed the final report on the future developments and competences. We also continued on working on the sustainable standard. And we discussed the concept self-assessment tools to map the current situation on the gap of the level towards the sustainability system on environment and sustainability in schools (salon). We started with the development of the learning material focussed on the environment in a sustainable salon. Also the first preparations on the awareness material on sustainability were made. A magazine and stickers to create awareness will be developed. The project works with student participation along the project. In Malaga a 3 days programme was executed. Using the competences of the different partners, their network, the experts, entrepreneurs in the sector and the teachers and students in the conferences and at home in the schools we combine knowledge and perseverance to finalize the task in a good way.

#### **Partners:**

Stivako, project coordinator, The Netherlands; Istituto Veneto per il Lavoro (IVL) Febelhair, Belgium; Instituto de Educación Secundaria El Palo, Spain; Regionaal Opleidingscentrum (ROC) Amsterdam, The Netherlands; Universidad Laboral Malaga, Spain; Provinciaal Instituut Vlaamse Ardennen, Belgium; Centro Italiano Opere Femminili Salesiane – Formazione Professionale – Lombardia, Italy.

#### **Multiplier event, 12th May Evening**

Well-attended Multiplier event in Malaga

On Thursday 12 May, a multiplier event was organized in Malaga as part of the Sustainable salon project. During this 4.5 hour event in a beautiful location in Malaga, approximately 110 visitors from the Hair and Beauty sector, hairdressing schools from all over Andalusia and local authorities attended the presentations, visited the information market and had time to network at the end of the evening.

In the presentations, attention was paid to research into relevant developments in technology, sustainability and entrepreneurship and the significance for the competences of the hairdresser; the various aspects of the environment in the hairdressing salon were discussed and one of the self-assessment tools developed was tested with the visitors present. About 85 visitors completed the scan for environmental awareness in the salon.

The information market with stands of the various parties involved was also well attended and most visitors only left for home towards the close of the evening. Both on the evening and the following Friday, many positive reactions were heard and there was a lot of interest among salon owners and teachers for additional information. All in all a successful event!
